

UNIVERSITI TUN HUSSEIN ONN MALAYSIA

**FINAL EXAMINATION  
SEMESTER II  
SESSION 2022/2023**

COURSE NAME : INDUSTRIAL ENGINEERING AND  
QUALITY MANAGEMENT

COURSE CODE : BNM 31903

PROGRAMME CODE : BNM

EXAMINATION DATE : JULY /AUGUST 2023

DURATION : 3 HOURS

INSTRUCTION : 1. ANSWER ALL QUESTIONS  
2. THIS FINAL EXAMINATION IS  
CONDUCTED VIA **CLOSE BOOK**  
3. STUDENTS ARE PROHIBITED TO  
CONSULT THEIR OWN MATERIAL  
OR ANY EXTERNAL RESOURCES  
DURING THE EXAMINATION  
CONDUCTED VIA CLOSED BOOK

THIS QUESTION PAPER CONSISTS OF **NINE (9) PAGES** ONLY

CONFIDENTIAL

**TERBUKA**

Q1 (a) List down **TWO (2)** factors that contribute to improper facilities utilization.

(2 marks)

(b) Determine **THREE (3)** factors effecting the location identification.

(3 marks)

(c) The objective of transportation model is for finding the lowest cost plan for distributing stocks of goods or supplies from multiple destinations that demand the goods.

(i) Explain **THREE (3)** important factors for implementing transportation model.

(6 marks)

(ii) The Sara Clothing Group in Johor own factories in three towns (Johor Bahru, Batu Pahat and Muar), which distribute to three retail dress shops in three other cities namely Kulai Jaya, Segamat and Pengerang. **Table Q1(c)** summarizes factory availabilities, projected store demands and unit shipping costs. Determine the optimal solution for shipping at the Sara Clothing Group.

(5 marks)

(iii) From **Q1(c)(ii)**, retrieve the value of optimal solution for shipping at the Sara Clothing Group.

(2 marks)

(iv) From **Q1(c)(iii)**, interpret the value of the optimal solution related to the cheapest shipping cost.

(2 marks)

- Q2** (a) List down **FOUR (4)** examples of ergonomics risk factors.  
(2 marks)
- (b) Ergonomics is classified into three main domains, which is physical, cognitive, and organizational. Describe the physical and cognitive domains of ergonomics.  
(4 marks)
- (c) Improper lifting techniques might cause a worker to obtain lower back pain disorder (LBD). With the aid of diagram, explain **THREE (3)** techniques for reducing the LBD potential among workers involving lifting activities.  
(9 marks)
- (d) As an industrial engineer at Keretapi Tanah Melayu Berhad (KTMB), construct **FIVE (5)** prevention strategies to avoid eyestrain for a boardman, who works 12-hours shift in a control room.  
(5 marks)

**Q3 (a)** 7 QC tools is one of the TQM principles, which are used in improvement activities. Explain the purpose of using scatter diagram and check sheet, respectively.

(4 marks)

(b) Pareto diagram is a tool for organizing cases such as errors, problems, or defects to help focus on resolving the most important cases and leaving the less important cases. A data on defects found in a production line was recorded by the quality inspection team using a check sheet. The recorded data is shown in **Table Q3 (b)**.

(i) Calculate the cumulative percentage for each type of the defects.

(5 marks)

(ii) Construct a pareto diagram for the defects with proper labelling.

(5 marks)

(iii) Identify the type of defects that requires attention to be resolved first.

(2 marks)

(c) By referring to scatter plots shown in **Figure Q3 (c)**, interpret the correlation between two variables under investigation.

(4 marks)

- Q4 (a)** Variation exists in all process output generated. Define **TWO (2)** categories of variation in a part production with an example for each category.

(6 marks)

- (b)** The results of inspection of 10 samples with its average and range are tabulated in the **Table Q4 (b)**. Use **Appendix A** to find the respective values of A and D.

- (i) Compute the control limits for the X-bar and R charts.

(4 marks)

- (ii) Plot X-bar chart for the inspection data.

(4 marks)

- (iii) Plot R chart for the inspection data.

(4 marks)

- (iv) Interpret the quality of the inspection data.

(2 marks)

**Q5** (a) Name **ONE (1)** international body and **ONE (1)** national body who manage the implementation and certification of the management standards such as ISO 9001 Quality Management Standard (QMS).

(2 marks)

(b) Explain **TWO (2)** reasons why industries and service providers should implement and certify to the management standards.

(4 marks)

(c) ISO 9000 series is the standard used for quality management and quality assurance in an organization. It focuses on what an organization does to ensure that its products or services conform to its customers' requirements.

(i) List down **FOUR (4)** quality management principles that ISO 9000 series focuses to enhance success.

(4 marks)

(ii) Explain the ISO 9001: 2015 requirements for Clause 9: Performance evaluation, and Clause 10: Improvement.

(4 marks)

(d) Mr Arman, a Quality Assurance Manager in Top Products Sdn Bhd, is planning for the ISO9001:2015 certification for the company. Determine proper steps that Mr Arman needs to follow for the certification purpose.

(6 marks)

- END OF QUESTIONS -

## FINAL EXAMINATION

SEMESTER / SESSION : SEMESTER II, 2022/2023 PROGRAMME CODE : BNM  
 COURSE NAME : INDUSTRIAL ENGINEERING AND QUALITY MANAGEMENT COURSE CODE : BNM31903

Table Q1(c)

To	From	Kulai Jaya	Segamat	Pengerang	Factory availability
Johor Bahru		RM 4	RM 3	RM 3	35
Batu Pahat		RM 6	RM 7	RM 6	50
Muar		RM 8	RM 2	RM 5	50
Store demand	30	65	40	135	

Table Q3 (b)

Time	Types of defects					Total
	Missing label	Off-centre	Smearred print	Loose or folded	Other	
8 - 9						6
9 - 10						3
10 - 11						5
11 - 12						3
1 - 2						1
2 - 3						6
3 - 4						6
Total	5	14	8	2	1	30
