

**CONFIDENTIAL**

**UNIVERSITI TUN HUSSEIN ONN MALAYSIA**

**FINAL EXAMINATION  
SEMESTER II  
SESSION 2018/2019**

COURSE NAME : YARN PRODUCTION  
TECHNOLOGY

COURSE CODE : BNH 20204

PROGRAMME CODE : BNH

EXAMINATION DATE : JUNE / JULY 2019

DURATION : 2 HOURS 30 MINUTES

INSTRUCTION : ANSWER ALL QUESTIONS

THIS QUESTION PAPER CONSISTS OF **FIVE (5)** PAGES

**CONFIDENTIAL**

- Q1**
- (a)
    - (i) As a textile engineering technologist, recommend the processes where blending of TC can be made. (2 marks)
    - (ii) Discover the benefit of producing TC. (2 marks)
    - (iii) List **TWO (2)** factors affecting the properties of blended yarns. (2 marks)
  - (b)
    - (i) Sketch **THREE (3)** opening devices used in blowroom line. (3 marks)
    - (ii) Describe **THREE (3)** factors affecting the intensity of the opening. (3 marks)
  - (c)
    - (i) Name the parts A, B and C in **Figure Q1 (c)**. (3 marks)
    - (ii) Explain the function of each part in **Q1(c)(i)**. (3 marks)
  - (d) Point out **TWO (2)** of the reasons why fibres must be prepared before combing process can be performed. (2 marks)
- Q2**
- (a) Describe the parts and operations involved in the elimination of short fibres in cards. (3 marks)
  - (b) A carding unit with calendar roller diameter 85mm is producing sliver at 27.3 kg/hr. The roller speed is 600rpm with 97% machine efficiency. The waste generated is recorded as 2.3%. Calculate the sliver weight (in Tex). (7 marks)
  - (c) Evaluate the card sliver weight if the infeed weight is 30 kTex and doublings are 6. (2 marks)
  - (d)
    - (i) Explain what is meant by yarn size. (2 marks)
    - (ii) Assess the difference between 180 Den yarn and 30 Tex yarn. (3 marks)
  - (e) Irregularity refers to the uneven distribution of fibres along the length of slivers.
    - (i) List **ONE (1)** mechanical factor that cause irregularity in drafting. (1 mark)
    - (ii) State **TWO (2)** suggestions on how to reduce irregularity of fibres in yarn processing. (2 marks)

- Q3** (a) Review the following problems and suggest methods to overcome them.
- (i) Too many long fibres in cylinder comb. (2 marks)
  - (ii) High neps and trash in comb sliver. (2 marks)
  - (iii) Too many noil elimination. Average noil elimination of not more than 15% was needed. (2 marks)
- (b) **Figure Q3 (b)** shows gear arrangement for spinning process. Analyse:
- (i) Draft between Front Roller (FR) and Middle Roller (MR) (3 marks)
  - (ii) Draft between Middle Roller (MR) and Back Roller (BR) (3 marks)
  - (iii) Total draft (3 marks)
- (c) Evaluate **THREE (3)** possible factors for end-breaks during ring spinning process. (3 marks)
- (d) Examine **TWO (2)** additional elements included in Roving process that distinguish it from the previous drawing process. (2 marks)
- Q4** (a) As a textile engineering technologist in a spinning industry, you found that some automation features need to be implemented to the operations. Highlight **FOUR (4)** areas in spinning where automation is necessary and justify the reason. (4 marks)
- (b) Wet spinning is one of the oldest polymer spinning process.
- (i) Explain the principle operation of wet spinning. (4 marks)
  - (ii) Construct the schematic of wet spinning process. (6 marks)
- (c) Determine **TWO (2)** functions of Balloon Control Ring (BCR) in Ring Spinning process. (2 marks)
- (d) Find the twist level for the following yarn sizes if the same TM25 is used.
- (i) 40 Tex
  - (ii) 10 Tex (4 marks)

- Q5** (a) Propose the methods of quality checking for the following output.
- (i) Opening and cleaning
  - (ii) Carding
  - (iii) Ring spinning
- (6 marks)
- (b) List **TWO (2)** types of yarn manufacturing methods operating on the open-end spinning principle.
- (2 marks)
- (c) (i) Describe the operational principle of Rotor Spinning. Include the suitable fibre type to be processed with this method.
- (6 marks)
- (ii) Explain the output characteristics produced by Rotor Spinning.
- (4 marks)
- (d) Demonstrate the function of flyer in roving process.
- (2 marks)

**-END OF QUESTIONS -**

FINAL EXAMINATION

SEMESTER / SESSION : SEM II / 2018/2019  
COURSE NAME : YARN PRODUCTION TECHNOLOGY

PROGRAMME CODE : BNH  
COURSE CODE : BNH 20204
